## ORDER A GOOD ONE.

Chief of Police Smith has issued an order instructing vehicles of every kind and description to move from the curb upon the approach of the sprinkling wagon, which will commence operations very shortly. This order is a good one and one that should meet with the approval of every citizen of Tonopah. And one that should have the attention and respect of every driver of express wagon, automobile or vehicle of any kind. The streets are to be sprinkled for the benefit of the entire public and all should lend every aid possible towards the thoroughness of the job. With wagons ranged along the curbing of Main street it would be utterly impossible for the sprinkler to properly settle the dust which is bound to collect along the edges. Chief Smith avers that any who fail to obey his instructions will feel the mailed fist of the law and probably be ordered to keep off the street entirely. This action would prove most fitting and meet with the approval of all.

## FACTS FAVOR RECIPROCITY.

A few days ago the dispatches had reference to a discrepancy between the Canadian wage reports and the wage reports of the United States. It appears that the question came up in debate in the senate, and that Senator Cummins of Iowa and Senator Smoot of Utah were active in calling attention to the supposed fact that wages in Canada were far below wages in the United States, and they were vociferous against the reciprocity agreement on this ground.

The claim that wages in Canada were far lower than in the United States was so wide of the fact, and so surprising to those who knew of wage conditions, that a search was immediately made to find upon what basis Messrs. Cummins and Smoot made their statement. It was almost immediately found that the difference in wages in the occupations concerned were arrived at by omitting board in this country and including it in Canada. When it was seen that the Canadian wage scale on the items in controversy included board, and the wages in the United States did not include board, the discrepancy was reconciled at once. It was seen that if board in the United States were included, or if board in Canada were excluded, the wage scales would be the same.

The controversy closed by the admission from Cummins and Smoot that the facts were as stated; that the claim which they had been urging of lower wages in Canada was fallacious, and that the returns which they had relied upon to prove the facts were erroneous in the respect stated. They were not aware, it appears, that board was included in the Canadian operations and omitted in the United States. Their position, therefore, was wholly baseless, and had to be abandoned. And thus one by one, as the touchstone of truth and fact is applied, the arguments against Canadian reciprocity must be abandoned.

## THE HALIFAX PROPERTY.

As stated in the Bonanza of yesterday, Malcolm L. MacDonald is now enroute to Tonopah, and upon his arrival the Halifax Mining company—now reorganized—will once more be put in operation. With F. M. ("Borax") Smith holding the balance of power under the new regime there is every possibility that work will be commenced on no mean scale. There is but little doubt in the minds of those on the inside but that the Halifax holdings will eventually prove most valuable producers. With a continuation of the great Belmont vein running directly through the property great things are expected from the Halifax.

However, whether the mine should prove up to the expectations of the stockholders or not, Tonopah will nevertheless reap a rich harvest from the fact that every effort will be put forth towards making the hoped-for strike. The resumption of operations on this property will mean a considerable addition to the force of miners now employed in Tonopah. The present single shaft will be enlarged to three compartments. New machinery will doubtless be installed and a large force of miners put to work as soon as the enlarged shaft is completed. Tonopah welcomes with open arms the new mining enterprise.

Diaz is perfectly willing to accede to the terms of Madero and hand in his resignation—but he will do so when he sees fit. Guess the "grand old man" of Mexico will be about ready to quit when father time has taken his number.

## THE WAY OF A WOMAN.

Inasmuch as we have always considered women somewhat finer and purer than men, we are shocked to read the report of an investigation conducted under the direction of several of the churches of New York, which charges that women are the main support of the immoral plays which have prospered in the past few years on the American stage and are even now touring the country at enormous profit.

Women have made financial successes of such offerings as "The Easiest Way," "The Girl in the Taxi," "The Girl from Rector's," "The Deep Purple," "The Queen of the Moulin Rouge" and a number of other disgustingly vulgar dramatic and musical efforts. These plays are notoriously evil and are advertised for their presentation of scenes that would bring the police down on them were they enacted in real life. Yet every one of them has done a larger business at matinees than at night performances, and women have all but fought at theater entrances to get an opportunity to see them.

The New York investigation is backed up by a statement by Wilton Lackaye, the playwright, made in Chicago the other day, so it would seem that the conclusion is not far from the truth.

This being the case, we hazard the suggestion that the women of the country take up the work of purifying the drama. They are very confident of their ability to clean up politics and drive corruption out of government in asserting their claim to the ballot. Meantime they might get some valuable practice from an attack on the immorality of the stage. They could force the discontinuance of any play of lewd or double meaning by remaining away from it. But can they overcome the curiosity of their sex sufficiently to meet such a test?

## THE DOVE OF PEACE.

With the firing upon the white flag by the Mexican insurrecto soldiers there is every indication that the dove of peace is not properly on the job. There is further evidence that the rebel troops are not properly officered, for the reason that the press dispatches state that the detachment which committed this breach of the rules of war was composed of one hundred men—unaccompanied by officers. It certainly indicates laxity of discipline when a detachment of this size can leave a camp and carry the battle to the enemy without the officers being cognizant of the fact. It belittles the ability of the officers when such a move is possible. No sympathy will go out to the rebel cause through any such tactics.

Further, several insurrecto bullets are said to have reached El Paso, one barely missing a woman who was sitting on the porch of her home. This will give Uncle Sam an opportunity to talk to the followers of Madero in no mincing manner.

In Greeley, Colorado, a game of baseball was played last Sunday in almost absolute silence, simply because the residents of a neighboring town had threatened to take steps towards the closing of Sunday baseball unless the noise ceased. Who would give a red cent to see a ball game and not be allowed to "root" and applaud when some member of the home team made a spectacular play? An amendment should immediately be made to the constitution of the United States which would prohibit "high-brows" from interfering with the pleasures of the baseball fans.

That is a sharp reply which Japan made to Russia on the latter's inquiry about the establishment of a Japanese consulate at Aigun. It is precisely as though a bear should ask a panther why he was chewing up a part of a flock which had been raided first by the bear, and the panther should reply that he was only doing what the bear had done first. And to that sort of an answer, no reply is possible, save a cuff, and that, in this case, the bear dare not deliver.

Next Sunday is the day, Goldfield is the objective point, a game of baseball between the Tonopah and Goldfield Elks the feature event. All who miss the day of entertainment will regret it to the longest day they live. The Tonopah team has sworn to massacre the Goldfield players. It will be worth while, so get aboard at 10 a. m. for the south.

A Harvard professor is credited (or charged) with the statement that Gray's "Elegy" would be rejected by the editor of any modern magazine. What a lot of return slips he must have been getting! But what does a professor at Harvard want to try to write poetry for, anyhow?

A New York jury has awarded a woman six cents damages in her suit against a man who kissed her against her will. Perhaps she was made "Exhibit A" by the defendant, thereby persuading the jurymen that it was impossible to resist a desire to kiss her.

A justice of the peace of Wood River, Illinois, is reported to have fined the Standard Oil company five dollars and costs for contempt. This may be taken to be the small end of the column which has the twenty-nine million-dollar fine for its base.

The United States senate hasn't averaged a half-hour session a day since the extra session began. And yet senators declare that they want to debate at great length the proposed reciprocity agreement with Canada.

It is barely possible that when Governor Woodrow Wilson becomes a candidate for president, he will find that there's no motive power to run his campaign, he has smashed so many machines.

The Sultan of Morocco is reported to be penned up in his capital. He probably won't mind if his foes don't intrude.

## BRUTALLY MURDERS GIRL.

STOCKTON, Cal., May 10.—While Margaret Martinez, a 19-year-old Spanish girl of whom he was insanely jealous was playing a piano yesterday afternoon for his entertainment, Paul Miller, a miner, aged 43, fired two shots into her back, killing the girl. Rushing into an adjoining room, Miller threw himself on a bed, placed a stick of dynamite into his mouth, lit an attached fuse and blew his head into fragments about the walls and ceilings of the badly wrecked room.
